Unit Converter

Installation guide · Windows 10 / 11 · Free · Version 1.0.1

Unit Converter is a small free app that sits in the corner of your taskbar, next to the clock. Click its red ⇄ icon, or press **Ctrl + Alt + U**, and it opens instantly just above the taskbar. Nothing to install: it is a single file.

1. Download

1. Open **apps.datpl.com** → Unit Converter → **Download**. You get **UnitConverter.exe** (about 60 KB).
2. Make a folder that you will not delete, for example **C:\Digital Arts\Unit Converter**, and move UnitConverter.exe into it. (If the file stays in Downloads and you clean that folder later, the shortcuts stop working.)

2. First start

1. Double-click **UnitConverter.exe**.
2. If Windows shows **“Windows protected your PC”**, click **More info → Run anyway**. This appears for new apps that are not yet widely downloaded; it is shown only once.
3. A welcome window opens. Keep both boxes ticked:
   • **Start automatically when Windows starts**: the icon is always ready after a restart.
   • **Add Desktop and Start Menu shortcuts**.
4. Click **Open Unit Converter**. The panel opens just above the taskbar.

3. Everyday use

- **Open:** click the red ⇄ icon next to the clock, or press **Ctrl + Alt + U** from any program.
- **Hide:** press **Esc** or click anywhere outside. The app keeps running in the corner, so it opens again instantly.
- **Keep it open:** click the pin button at the top of the panel.
- **Copy a value:** double-click a row in the table.

4. If you can’t see the icon

Windows 11 sometimes hides new icons behind the small ^ arrow next to the clock. Open the arrow and drag the red ⇄ icon onto the taskbar. Or go to **Settings → Personalization → Taskbar → Other system tray icons** and switch **Unit Converter** on.

5. Pin to the taskbar (optional)

Open the Start Menu, find **Unit Converter**, right-click it → **Pin to taskbar**. Clicking the pinned icon opens the same panel.

6. Settings and removal

- Right-click the tray icon to switch **Start automatically with Windows** on or off, add shortcuts again, or **Exit**.
- To remove: right-click the tray icon, turn off *Start automatically with Windows*, click **Exit**, then delete UnitConverter.exe and the Desktop / Start Menu shortcuts. Your settings are in %APPDATA%\DigitalArts\UnitConverter (safe to delete).
